Question: Did you feel distracted during the session? Please describe."

No.	distraction (v_75)
32	Was not able to concentrate well
33	Yes, at one point where I got distracted by voices as I was following conventional method.
34	Not at all.. I was focused on my breathing.
35	Yes, at the start of the experiment, the VR headset was probably not placed properly, causing some discomfort on the left side of forehead. Required a minor adjustment after which I was able to focus better on the experiment.
36	Felt normal. Nothing changed.
37	I was distracted because I was constantly thinking about how much time was left.
38	The machine was slightly uncomfortable which caused a bit of distraction for me.
39	No
40	The headset was very heavy
42	No, it carried on well.
43	Not at all
44	Not at all
45	The voiceover during the meditation session is too much, it breaks the rhythm of peace and quiet. It was slightly irritating.
46	Little bit due to high brightness.
48	The headset was heavy other than that it was good
49	Everything was ok
50	No
51	No
52	Not al all.

53	No I didn't feel any distraction.
54	NO,AS I ALREADY EXPEREINCE MEDITATION ALOT, I LOVE TO DO IT AGAIN ANG AGAIN
55	Hmmm
58	No
59	Yes.. I could not focus due to work load and other things kept on coming with each breath I took...
60	The head set was bit heavy than meta one.. I normally use meta VR headset.. so it bit uncomfortable. It was good experience.
61	The rapid guidance were annoying.. I did not like the lights as it putting strains on my eyes... And the meditation should be done in the quite room and no body should be there, but the examiner was there and it was making me uncomfortable.
62	no
63	I wasn't distracted
64	No because guidance was very clear
65	No I did not felt distracted
66	Yes the music was loud for me
67	No distractions.
68	Only when the AI spoke overall it was good
69	No
70	No I didn’t feel such thing
71	Not at all
72	The seat was uncomfortable.. I normally meditate while sitting on ground
73	Yes.. I never meditated and I was started to feel bored after some time.
74	Yes I was unable to focus
75	I was unable to concentrate
76	Not as such, Just boring

Question: “How immersive / compelling did the experience feel to you?”

No. immersive (v_76)

32	Not at all
34	Completely
35	Partially. During the course of the experiment, I had this constant feeling that I was part of some simulation. As a result, at no point I felt disconnected from my real surroundings. However, I did notice the influence of instructions from the VR-assistant on my mental/emotional state.
36	It was ok. I got bored after few minutes.
37	It was less compelling because I was aware of the environment and could not concentrate on the meditation itself.
38	Would like to do more virtual meditations.
39	Immersive
40	It was ok . Not that I will do it actually for meditation
42	So compelling that i would really try it again.
43	It could have been better with more real life vr scenes
44	Quite relaxing
45	It was very immersive and compelling. It soothed my mind and body.
46	Very much
47	Very much
48	Very immersive the guidance was good and light on my eyes helped me to breathe long breath. I felt very calm after session.
49	It was normal.
50	Very compelling
51	Very immersive
52	I was completely into it I was feeling sleepy
53	It was a nice experience and very relaxing one.
54	ITS WAS QUITE WELL
58	It was very immersive
59	Not at all I was recalling other work related things.

60	Very much immersive. The music along with the guidance helped me to do meditation. And the light for breathing was bit slower so I had problem with breathing with that pace.
61	Not at all I wanted to remove the headset due to its weight. And the guidance was annoying.
62	very immersive
63	Pretty compelling and interesting
64	Super
65	Very much immersive.. my felt relaxed
66	Everything was good except music
67	It was pleasant
68	It was good apart from AI speech
69	I feel very immersive
70	I feel very mich immersive
71	Very good
72	It was calm and good. The background music was good addition
73	Well I didn't knew what to do except breathing. So I was looking around.. not immersive at all.
74	Due to stress I could not concentrate well
75	No.
76	Not exciting

Question: “Would you choose to use this method again?”

No.	method prefernce (v_77)
32	Maybe with proper guidance will be able to perform well
33	I would like to go for a VR experience next time.
34	Yes.. to keep my mind clear
35	Not really. I would prefer conventional meditation methods.
36	No

37	No, because it mainly depends on an individual's ability to control and meditate, which is not attentive towards the task.
38	Because it helped me bring the lost energy and motivation.
39	As it is done like this
40	No I won't as the headset was heavy making it not comfortable
42	Yes, because it calmned me down and almost released all the stress i had at that time.
43	Yes , because it isolates you from the real world
44	Sure
45	I would try it!
46	Yes
47	Yes
48	The guidance through voice and breathing guidance through lights helped me to do meditation very well. I choose high I think the session should be longer. It ended very quickly.
49	Yes. I often meditate
50	Maybe, I believe meditation in an open environment breathing fresh air would be more compelling
51	Yes, conventional method is more immersive and engaging
52	Yeah.. I felt relaxed and sleepy.
53	Yes I will choose this method again because it is more personal because of no human being involved in it.
54	CONVENTIONAL, I FEEL MORE COMFORT AND EXPERIENCE THIS ALOT IN MY LIFE
58	Yes. It relaxed my body and mind releasing tension.
59	I don't know how to meditate. So no
60	Definitely. It was good and relaxing experience. It needs to have some other features added to it like some land scape view. For complete immersion in vr.
61	If the thing like lighter headset. With good voice and less instruction then yes. Otherwise no
62	yes, it was good.
63	Yes and because it's similar

64	Yes because i haven't done meditation and i need guidance
65	Yes... My body was relax and I felt sleepy
66	Yes.. it helped me relax and guide me how to meditate
67	Sure
68	Sure
69	Yes its a greta method. I would choose again
70	Yes I would like to do it again
71	Yes. Because it was peaceful
72	Yes.. as it helps me to focus.
73	No. I was bored
74	Yes.. with properly guidance
75	I don't know. May be
76	No
